

## Second Year Computing

### Web Programming and Databases

#### Php Lab Sheet 3

**To be completed by Friday 18<sup>th</sup> February**

Please save your files for this exercise sheet on your M : \WebDev folder in a subfolder called php3.

Upload the files to the httpdocs/php3 folder (you need to create this folder) on the server and **run the files from your browser**. *Yourcomnumber.candept.com/php3/*

If you make any changes to these files within Plesk, ensure that you put the updates back in your M drive.

#### Task 1

For this lab session you are to create the html and php files for

db.inc.php

view.php

insert.html

view.html.php

insert.php

displayview.php

view.html

as outlined in the slide show - phpMySql 3 on blackboard.

#### Task 2

Add the following columns to the person's database table:

email address

Phone number

Write the html, javascript, and php to insert a record in the person's database table with details for all the fields.

Write the html, javascript, and php to display all the details from the person's database table.

Save the files as insert2.... and view2... etc. Upload them, then open them in your browser.
